EDUCATION

Dwarkadas J. Sanghvi College of Engineering

Expected 2028

B.Tech, Information Technology (Honours in DevOps) | GPA: 8.4

Mumbai, India

- Relevant Coursework: Advanced Java, Design and Analysis of Algorithms, Formal Languages and Automata Theory, Object-Oriented Programming & UML

PROJECTS

FraudGuard AI | FastAPI, React, scikit-learn, Docker, Kubernetes, Prometheus, Grafana

2026

- Built a multi-channel fraud and phishing detection platform analyzing SMS, email, and URLs in real time, using TF-IDF classifiers and a Random Forest model for scoring
- Deployed the FastAPI and React services on **Kubernetes** with a **Horizontal Pod Autoscaler** to absorb bursty inference traffic, and instrumented a `/metrics` endpoint scraped by **Prometheus** and visualized in **Grafana**

RASC-Net: Adversarial Skin Cancer Defense | PyTorch, TensorFlow, React, Docker, Hugging Face

2026

- Designed a custom Residual Attention network (2.88M params) for skin lesion classification, trained with a curriculum adversarial schedule to resist adversarial perturbations
- Built a multi-stage image defense pipeline (bit-depth reduction, blur, JPEG compression) that raised FGSM-attacked accuracy from 24% to 62.5%, plus a clinical decision support layer with automated PDF reporting

SVAMITVA AI Feature Extraction | PyTorch, FastAPI, Next.js, Render, Vercel

2026

- Built for Smart India Hackathon: a PyTorch U-Net segmentation model and EfficientNet-B0 classifier that extract building footprints, roads, and waterbodies from drone orthophotos
- Implemented custom GIS vectorization (contour extraction, Shoelace area calculation) and deployed the pipeline across three services with model weights synced from Hugging Face Hub at runtime

Job Application Tracker API | Java 17, Spring Boot, PostgreSQL, Redis, Docker

In Progress

- Developing a Spring Boot REST API covering JWT authentication with role-based access, Redis caching, Flyway-managed migrations, and Testcontainers-based integration tests, containerized with Docker Compose

SKILLS

Languages: Java, Python, TypeScript, SQL

Frameworks/Libraries: Spring Boot, FastAPI, React, Next.js, PyTorch, TensorFlow, scikit-learn

Tools/Technologies: Docker, Kubernetes, Git, Linux, PostgreSQL, Redis, Prometheus, Grafana

AWARDS

UGEE Rank 53: Ranked 53 in the University Grants Entrance Examination
